# Pilot Site #3: Figueres (SP)

### Summary

Medium-sized Mediterranean city in Alt Empordà (Catalonia) with high-quality drinking water mostly supplied by the Boadella reservoir, but exposed to recurrent scarcity and strong seasonal peaks driven by tourism and irrigation. The pilot strengthens coordination between municipal, basin and regional actors, sets up a River Basin Water Forum and applies governance diagnostic tools to support more transparent, participatory allocation decisions in the Muga catchment.

Led by EUT and FIGUERES
